

March 2, 2010

The Honorable Debbie Ann Stabenow
Hart Senate Office Building
Suite 133
Washington, DC 20510

Dear Senator Stabenow,

On behalf of the Blue Climate Coalition, we wish to thank you for your efforts in advancing marine conservation as part of the solution to climate change.

We are thrilled that the Clean Energy Partnerships Act of 2009 recognizes that healthy coastal and marine ecosystems can help mitigate climate change.

The term "vegetated marine coastal habitats" will help ensure that the conservation and restoration of coastal and marine ecosystems, that store atmospheric carbon, is included in national climate change policy. Such important carbon storing ecosystems include mangrove forests, saltwater marshlands and seagrass meadows.

Thank you again for your interest in marine conservation and climate change issues. The Coalition looks forward to assisting you however we can.

Sincerely yours,

Signed by fifty-eight members of the Blue Climate Coalition:
